

Interconnection Application and Agreement for Distributed Generation

Section 1. Customer Information

Name: _____

Mailing Address: _____

City: _____, State _____ Zip Code: _____

Street address (if different than above): _____

Daytime Phone: _____ Evening Phone: _____

Utility Customer Account Number (from utility bill): _____ (must include)

Section 2. Generation Facility Information

Service Voltage and Phase: _____

**Note: 3-Phase Installations: See EEA Engineering Policy #2, "D.G. & 3-Phase Service".

System type: (Circle One) Solar Wind Hydro Other _____

Generator/Inverter Size (kW AC): _____

If applicable, Solar PV Array Size (kW DC): _____

System Classification:

- 10kW AC or less & single-phase service
- 3-Phase service or greater than 10kW AC but less than 25kW AC
- 25kW AC or greater

Inverter Manufacturer: _____

Inverter Model: _____

Inverter AC Power Rating: _____

Inverter Voltage and Phase: _____

Inverter Location: _____

Visible Open Disconnect: In accordance with Board Policy #56 (please provide cutsheet)

Manufacturer & Part Number: _____

Location: _____

Section 3. Planned Installation Information

Installer: _____

- Licensed Electrician, License # _____
- Certified PV Installer, Certification # _____
- Property Owner

If not the property owner, please provide:

Mailing Address: _____

City: _____, State: _____, Zip Code: _____

Phone: _____

Section 4. Certification

1. The generator/inverter complies with the requirements of applicable IEEE standards and is listed by Underwriters Laboratories (UL) or other nationally recognized testing laboratory.

Signed (Equipment Vendor or Owner): _____ Date: _____

Listing: _____ (UL or other NRTL)

2. I _____ (System Owner) certify that all the information I have provided in this application is true and accurate, and that I have and will maintain a liability insurance policy as required by the rate schedule for the entire time that I am generating power under this rate schedule and shall deliver a copy of the certificate of insurance to Empire Electric Association, Inc., upon request.

Signed (System Owner): _____ Date: _____

Section 5. Requirements

To gain engineering approval, owner/developer must provide EEA with system design plans including a cut-sheet data for generator/inverter & visible open disconnect, one-line electrical & plan drawings showing proposed placement of the distributed generation/inverters and any additional items which may be required. Empire Electric will provide the owner/developer notification approving or denying the installation based on its compatibility with the utility distribution system.

Section 6. Utility inspection and Approval

Application shall be filed with EEA and approved prior to commencing any work.

1. Application Approved: _____ Date: _____

2. Engineering Approval: _____ Date: _____

Post-Construction Inspections:

1. State Electrical Inspection: _____ Date: _____

2. EEA System test by: _____ Date: _____
