Essay

I intend to continue my college education in order to obtain my bachelors degree in biology, and use that to move on from my current institution to medical school. I will then join the work force as a medical professional. I currently intend to become a cardiothoracic surgeon, but I have not settled on a specialty quite yet. My family is supportive, but only in an emotional capacity, as I have been paying for my education by myself, and I have also been paying for food and housing on my own. I work on and off without a steady income, and this coming year I am moving into an apartment with my girlfriend. I will be working on finding a job in Greeley, Colorado to help aid with school and housing payments, but require help in order to afford my education. My education is the most important aspect of my life currently, and will allow me to pursue my passion for medicine. I will not let financial barriers keep me from my future as a surgeon, and that is why I am asking for the help of the Empire Electric Association.

UNOFFICIAL

UNIVERSITY OF
NORTHERN COLORADO

College of Natural and Health Sciences
Advising Center

June 12, 2026

To Whom It May Concern,

I am pleased to write this letter of recommendation for AJ Hafner, a rising sophomore at the University of Northern Colorado, where he is pursuing a degree in Biological Sciences with a concentration in Pre-Health and Biomedical Sciences. In my role as Health Professions Advisor, I have had the opportunity to know AJ over the past year, including as his instructor in the Foundations of Pre-Health course this past spring semester.

AJ has distinguished himself as an exceptional student from the start of his academic career at UNCO. He maintains a perfect 4.0 GPA, earning all A's in a rigorous first-year curriculum that includes Biology, Chemistry, Statistics, Scientific Writing, and Honors-level coursework. His academic performance reflects not only his intellectual ability but also his disciplined work ethic and unwavering commitment to excellence.

Beyond his academic achievements, AJ is a conscientious and engaged learner. He attends class consistently and demonstrates a proactive approach to his education by seeking feedback and guidance outside the classroom. He is not satisfied with merely completing assignments—he strives to ensure his work meets the high standards he sets for himself. This level of dedication is both commendable and indicative of his future potential.

AJ also stands out as a leader among his peers. He contributes thoughtfully to class discussions, offering insightful perspectives while also encouraging and supporting the contributions of others. His collaborative nature and respect for his classmates create a positive and productive learning environment.

Importantly, AJ has demonstrated a clear and serious commitment to pursuing a career in medicine. Even at this early stage, he has begun researching medical school programs and requirements, showing initiative and foresight in preparing for his future. I am confident that he possesses the focus, intellectual curiosity, and perseverance necessary to succeed on the pre-med pathway.

I anticipate that AJ will continue to excel as he expands his experiences through research, clinical exposure, and shadowing opportunities. Financial support through this scholarship would have a meaningful impact on his ability to dedicate time and energy to these essential activities, further strengthening his preparation for medical school.

In summary, I give AJ Hafner my strongest recommendation. He is an outstanding student and an emerging future healthcare professional who will undoubtedly make significant contributions to the field of medicine.

Sincerely,
Susan Andersen, EdD
