

## August 2024 Update for Large Power and Transmission Service Rate Components

Tri-State Generation and Transmission Association has notified Empire Electric Association that the Federal Energy Regulatory Commission approved their most recent rate filing. The new tariff is effective August 1, 2024, subject to refund. The new tariff includes the rate increase EEA anticipated to take effect in January 2024 but was delayed while Tri-State addressed concerns brought by FERC in the rate review process. The new tariff also incorporates a change to the Tri-State Peak Period as noted below.

The new billing components will be used to calculate the September 2024 billing statement for power delivered in August 2024. The new EEA Large Power and Transmission Service rate components are:

Generation Demand Charge: \$12.05400/kW\*

Transmission Demand Charge: \$12.39400/kW\*

Energy Charge: \$0.03434/kWh

\* The measured demand at EEA's highest thirty (30) minute integrated total demand measured in each monthly billing period during the Tri-State Peak Period. **Beginning August 1, 2024, Tri-State's Peak Period is from 1:00 PM through 9:00 PM daily, Monday through Saturday**, with the exception of the following six (6) holidays if occurring on Monday through Saturday: New Year's Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day, and Christmas Day.

A copy of EEA's tariffs is available at [eea.coop/rates](http://eea.coop/rates). If you have any questions regarding the rate component or peak period time change, please contact us at (970) 565-4444 or email [energy\\_management@eea.coop](mailto:energy_management@eea.coop).
